Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO99/35202 to cited by the applicant in view of any of Harvie et al (5693405), Fishel et al (5914173) or Aukermann (6680098).

The WO document teaches the invention substantially as recited wherein a non-halogen formed tape is produced. Refer to the entire document. It does fail to teach recessed or projecting indicia embossed on the backing for identification purposes.

All of the secondary references teach to form indicia on a plastic film in order to be able to provide indicating means thereon. Refer to figures and 2 in Fishel et al. Refer to figures 4 and 5 in Harvie et al that shows a raised logo (34,54). This reference is particularly pertinent since layer 42 can be an adhesive layer (column 7, lines 32-34), therefore directly showing the embossing in the backing layer as recited by the applicant. Refer to figure 1 showing embossed indicia in a backing layer of a tape along with column 5, line 21 through column 6, line 24. Layer 9' can be an adhesive layer which form a tape structure as recited (i.e. backing layer and adhesive layer).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to the primary reference to emboss a pattern in the

Art Unit: 1772

backing layer of the tape, as shown by the secondary references, in order to provide indicating indicia thereon motivated by the fact that the secondary references teach this is a desired property in backing layers of tapes.
